Dear Suhas,

Yes, I am also really happy to hear this great news!
Below is my evaluation report requested by Prof. Gunter, and
it is for your reference. I hope that you will have good
result from UIUC.

About publishing your previous result, I will try to consider it when I have enough time. Work here is heavy and usually there is
no
enough time for other job.

=====
I took care of Mr. Suhas Aggarwal's intern for about
half year through Internet on the topic of applied cryptography. During that period of time, Suhas demonstrates strong
motivation
and enthusiasm in studying applied cryptography and information
security. Based on one of my previous papers, I assigned him
key recovery as the intern research topic and some new result
has been obtained. I did not ask him to do more, but Suhas's
strong enthusiasm in doing research again pushed him to select
another topic and invited me continuing to advise him.
This is not the first time that I accepted IIT students'
invitation as an intern adviser. But, Suhas achieves the best
among the IIT students that I have advised.

Sung-Ming Yen
